

HOUSED BEDS CASES Activity Guide

Materials needed:

HOUSED BEDS cases
HOUSED BEDS facilitator guides for each case
HOUSED BEDS pocket cards
Dry erase boards
Dry erase markers
Dry erase board erasers

Time plan:

7 minutes small group practice
3 minutes to debrief
20 minutes for talk through each case

1. Break into groups of 2 (one is patient and has the case, the other is the team member asking the questions) or 3 (patient, asker, observer)
 - a. If working in group of 3, the observer will have the dry erase board and marker. They should turn around (back to their group) so they are just listening.
 - b. Instruct observer to write down missed questions, assets, challenges they hear in the patient's history
2. Give each group their own case. If a large group of participants, may use 1 case more than once for richer group discussion.
3. Give groups 7 minutes to work through HOUSED BEDS as best as they can
4. Give groups 3 minutes to debrief together on how the history went, feedback, review 'answers'
5. Come back together as a large group and work through the facilitator guide.
